

Introducing Wisconsin's Asthma-Safe Homes Program

Create Your Asthma-Safe Home

Delivering free in-home asthma services to help families breathe easier

The Wisconsin Department of Health Services launched a new state program in fall 2022 to help kids, ages 2-18, and pregnant parents struggling with poorly controlled asthma.

If you live in Milwaukee or Kenosha counties and are eligible for Medicaid state health insurance, find out how to access the following free services:

- Asthma self-care education at your home
- Asthma supplies up to \$1,000 for your home
- Home assessment to look for asthma triggers
- Home repairs up to \$5,000 for eligible repairs

These services can help you:

- Find ways to reduce asthma triggers at home.
- Learn how to better control your asthma.
- Live your best life.
- **Save money** by:
 - Using less medication.
 - Making fewer trips to the emergency room.
 - Avoiding overnight stays at the hospital.
 - Missing fewer days of school and work.
 - Accessing free supplies and professional services to create a healthier home.

Three easy steps to access services

1. Ask your health care provider, school nurse, pharmacist or asthma educator for a referral to the Asthma-Safe Homes Program.

2. Meet an asthma educator for two to six sessions to get home supplies. If eligible, you will receive a detailed home assessment.

3. Accept a referral for home repairs if the assessment uncovers major asthma triggers. Repairs are available to renters or owners.
